

VDR10 Vehicle Data Recorder

V1.2

- Realtime Data Logging
- Support RFID (Driver Login)
- Connect to LocaVMS Service via Wi-Fi
- (Optional) Adaptive Vehicle Control

Installed on vehicle, the VDR collects the real-time operation data from the vehicle. When the Base Station is installed, the VDR also collects the ranging data from it. The collected data is then uploaded to cloud service for analyses.

Specifications

Wi-Fi Protocol	802.11 b/g/n (802.11n up to 150 Mbps)
Bluetooth Protocol	Bluetooth v4.2 BR/EDR and BLE
RFID Interface	ISO14443-A/B
Universal Inputs	max. 48 VDC 50mA
Antenna	Internal matched antenna
Power Supply	6 – 36 VDC
Housing	PVC
IP Rating	IP55
Operation Temperature	-20°C to 70°C
Humidity	5 – 95% (no condense)
Dimensions	190x90x51 mm
